

**DEPARTMENT OF DEVELOPMENTAL EDUCATION
MATH 0920 & 0950
FINAL STUDY GUIDE**

This guide is arranged by page order of the textbook rather than by problem order on the final exam. You will find problems on the final exam similar to those listed here.

DIRECTIONS: Look at all of the exercise groups before beginning to work on any of the problems. This will give you a good overview of what to anticipate on the final. Then work the four problems from each exercise group. Look up the answers. If you answered them correctly and feel confident about your work, go on to the next exercise group and follow the same procedure. If you did not answer them correctly and/or you do not feel confident about your work, then you can practice additional similar problems in the textbook.
